🏠 **No minimum** order

Why it sells.

Bad breath is the question patients ask last and quietly. Tongue coating is the most common source, and nothing on a standard oral care shelf addresses it.

An unserved gap

Most shelves hold nothing between toothbrushes and mouthwash. This is a category with no incumbent.

Built-in repeat purchase

The brush is replaced regularly and the gel is a consumable, so the second sale is built into the first.

Safe to recommend

Dentist-designed, made in the USA, and distributed locally with Australian stock and support.

31.8%

of adolescents and adults are estimated to have halitosis.

80–90%

of bad breath originates inside the mouth rather than the stomach or sinuses.

43%

of halitosis cases in one clinical study traced back to tongue coating.

Silva et al., Clinical Oral Investigations, 2018. Frontiers in Oral Health, 2023 narrative review. Information for wholesale customers; not a therapeutic claim.
